SYLVANIA STAT

Index to volume 1

The indexing terms are related to abstract code numbers eg 1.1.21, and to article references including first and last page numbers, eg 1.5 162-269.

Subject index

Absenteeism,
causes of in industry 1.5.262–269
Accidents (see also safety),
car windscreen injuries and 1.3.69
road and lighting 1.4.92
road junctions and 1.5.108
Acoustic Design,
thermal design and 1.5.129
Adaptation,
to cold 1.3.76
Adaptive Techniques,
pilot training 1.1.4
Aeronautical Charts,
design of 1.5.112, 1.5.113
Ageing,
reaction time and 1.2.39
transportation needs and 1.5.11
Agricultural Equipment,
design of 1.5.107
in India 1.1.2
noise and hearing damage from 1.5.128
Air-Bags,
as safety devices in cars 1.4.104
Air Conditioning, 1.4.97
offices 1.5.122
Aircraft (see also Helicopters),
altimeter design 1.1.16–24
jet, aircrew fatigue in 1.1.7
landing and optical rate displays 1.1.8
noise from 1.1.11, 1.1.12, 1.1.13, 1.3.60, 1.4.103
noise tolerance standards 1.5.127
vibration in 1.5.258–261
Aircrew (see also Pilots),
backache in 1.5.109
effect of vibration on in helicopters 1.5.134
fatigue in 1.1.7
Airports,
ergonomic aspects 1.4.84
planning and noise 1.1.13, 1.3.60
Alcohol,
and driver recognition of pedestrians at night 1.2.26
Altimeters,
design of 1.1.16–24
Ambulances,
design of 1.4.86
Anthropometry,
aircrew clothing size and 1.1.15, 1.3.64
seat design and 1.3.159–165
Applied Psychology Unit (MRC)
work of 1.3.169–176
Armed Forces,
clothing sizes in aircrew 1.3.64
fatigue in 1.3.62
Assembly Line,
inspection 1.3.49
Athletics,
reaction time 1.2.39
Atmospheric Pollution – see Pollution, atmospheric
Automated Meat Handling Project,
workstation analysis for 1.1.45–51
Automation,
selection and training of personnel for 1.3.130–133
systems design and implementation 1.3.130–133

Backache – see Spinal Troubles
Back Rests,
design of in seating 1.3.159–165
Behavioural Effects,
internal environment of buildings and 1.3.144–150
Bibliographies,
training 1.4.105
Blind,
route maps for 1.5.111
Body Movement,
analysis of 1.3.66
workspace design and 1.3.151–158
Braking,
severity of 1.4.79
Brakelight Displays, 1.2.27, 1.3.71, 1.4.79
Brightness,
luminance of rooms and 1.5.124
Bridge Parapets, 1.5.119
Buildings,
acoustic and thermal design 1.5.129
assessment of internal environment 1.3.144–150
Buses,
contribution to traffic noise 1.2.29
control systems for 1.2.21
vibration in 1.5.258–261

Cars (see also Road Vehicles, Transport Systems),
brakelight displays 1.2.27, 1.4.79
design for police patrol 1.5.114
parking 1.4.81
vibration in 1.5.258–261
windscreen injuries 1.3.69
Car Driving,
effects of background noise on 1.2.37
Car Parks,
illumination of 1.4.94
parking lines 1.4.81
Cartography, 1.5.112
Central Nervous System,
effect of micro and radio waves on 1.5.135
Chain – Saw Operators,
vibration disease in 1.3.74
Checklist (ergonomic), 1.1.33–41
industrial use in Japan 1.2.70–72
personnel selection 1.2.66–69, 1.3.140–143
Chemical Industry,
design for noise control in plant 1.3.56
Circadian Rhythm,
jet aircrew fatigue and 1.1.7
shift work and 1.2.36
Classrooms,
lighting of 1.4.96
Cleanliness,
industrial lights 1.4.93
Clothing,
ergonomic design of 1.1.20
protective for trawlermen 1.3.73
reflectorised pedestrian 1.2.26
road safety 1.1.19
sizes and anthropometry 1.1.15, 1.3.64
Coin design, 1.1.53–57
Cold Micro Climate,
and skin temperature 1.3.76
Colour,
illumination and 1.5.277–288
road safety clothing 1.1.19
Combine – Harvesters – see Grain Harvesters
Computers,
in traffic control 1.2.21, 1.2.23
Consortia,
for integrating internal environment 1.4.97
Construction Equipment,
noise and hearing damage from 1.5.128
Consumer Products,
testing of 1.5.295–300
Controls, 1.2.95–106
combine harvesters 1.5.107
hovercraft 1.3.134–139
motor vehicle driving compartments 1.5.120
positioning in panels 1.2.107–112
positioning in turret lathes 1.5.302–309
Cost – Benefit Analysis,
ergonomics in general 1.2.79–84
headlight glare reduction 1.4.95
maps for blind travel 1.5.111
Crash Barriers, 1.5.119

Daylight,
spectral power distribution 1.1.9
Damage Risk Criteria,
from noise in aircraft 1.4.103
Design (see also Workspace Design and Industrial Design),
aeronautical charts 1.5.112, 1.5.113
aircraft altimeters 1.1.16–24
airports 1.4.84

ambulances 1.4.86
clothing 1.1.15, 1.1.20, 1.3.64
coins 1.1.53–57
combine harvesters 1.5.107
counters 1.2.86–94
factories 1.4.77
hand prosthesis 1.3.72
industrial 1.2.41, 1.3.48
industrial seating 1.3.159–165
instruction cards 1.2.24
journals 1.4.207–209
light sources 1.5.277–288
machine controls 1.2.95–106
metric rules 1.4.198–201
military vehicle fighting compartments 1.4.87
musculoskeletal disease and 1.5.262–269
noise control and 1.2.73–78, 1.3.56, 1.3.59
office 1.4.77
police patrol vehicles 1.5.114
road signs 1.1.17, 1.4.80
scales and dials 1.2.86–94, 1.4.198–201
ships bridges 1.4.88, 1.4.89
slide rules 1.4.198–201
tabular information 1.4.234–242
tool handle 1.3.68
underwater rescue vehicles 1.5.115
vehicles for the disabled 1.4.85
window 1.5.270–272

Deafness,
from loud music 1.3.61
occupational 1.3.58, 1.3.59

Decision making,
male and female pilots 1.1.5

Decision Response Time
male and female pilots 1.1.5

Dehydration,
jet aircrew fatigue and 1.1.7

Design offices,
efficiency and work study in 1.3.47

Dials,
design 1.2.86–94

Disabled,
design of vehicles for 1.4.85

Disease – see Industrial Illness and Musculoskeletal Disease

Displays, 1.2.86–94, 1.3.50, 1.3.52
aircraft height information 1.1.16–24
brakelight 1.4.79, 1.4.80
motor vehicle driving compartment 1.5.120
relationship with controls 1.2.107–112

Doors,
access to in underground railway trains 1.1.4–11

Driving – see Car Driving, Bus Driving etc.

Dust,
on industrial lights 1.4.93

Ear Protection – see Hearing, protection

Economics,
coin design and 1.1.53–57
classroom lighting 1.4.96
ergonomics in general 1.2.79–84

Efficiency,
office 1.3.47
inspection procedures 1.5.289–294
working height of hands and 1.5.110

Electromyography,
work study and 1.3.46

EMI Electronics Ltd., Ergonomics Laboratory,
work of 1.4.228–233

Environment – External
hovercraft and 1.3.134–139

Environment – Internal (see also Working Environment, Noise, Illumination, Temperature, Ventilation, Vibration),
automated meat handling 1.1.45–51
buildings and 1.3.144–150
engine drivers cabins and 1.5.118
hovercraft 1.3.134–139
human behaviour and 1.3.144–150
industrial inspection and 1.3.49
integration of factors 1.4.97
productivity and 1.4.194–197

Equipment,
layout of in ships' bridges, 1.4.88, 1.4.89

Ergonomics,
aims and philosophy 1.1.2–3
history 1.1.42–44
international scene 1.1.42–44
societies 1.1.42–44, 1.2.70–72, 1.3.166–167

Escalators,
in underground railways 1.1.4–11

Evaluation,
protective clothing for trawlermen 1.3.73

Eyes (human)
effects of lasers on 1.2.28

Factories,
noise and vibration from 1.5.131
working conditions 1.4.77

Fatigue,
criteria and tests for 1.3.62, 1.3.65
industrial inspection and 1.5.289–294
jet aircrew and 1.1.7
rest pauses and 1.2.35
workload and 1.3.62, 1.3.65

Fighting Compartments,
military vehicles 1.4.87

Flight Time,
fatigue in jet aircrew and 1.1.7

Gates,
automatic in underground railways 1.1.4–11

Glare,
vehicle headlights 1.4.95
white and yellow light sources 1.5.125

Grain Harvester,
design 1.5.107
in India 1.1.2

Hands,
dimensions and posture 1.3.68
prosthesis design 1.3.72
working height and efficiency 1.5.110

Handles,
design of for tools 1.3.68

Headlights,
glare reduction 1.4.95
range and car load 1.5.123

Hearing,
effects of loud music on 1.3.61
effects on noise on 1.3.58, 1.3.59
protection 1.3.59

Heart-rate,
of turret-lathe operators 1.5.302–309

Heat gain,
illumination and 1.4.97

Heat – see temperature

Height of aircraft,
display of information 1.1.16–24

Helicopters,
piloting and navigation 1.1.6
vibration in 1.5.134

History,
of aircraft altimeter design effort 1.1.16–24

Hollands Technique,
for analysis of industrial inspection 1.3.49

Hospitals,
lighting and 1.1.10

Housework,
ergonomics and 1.4.223–227

Hovercraft, 1.3.134–139
vibration in 1.5.258–261

Human Dimensions – see Anthropometry

Illness – see Industrial Illness, Musculoskeletal Disease, etc.

Illumination (see also Luminance), 1.3.51, 1.4.90, 1.5.277–288
car parks 1.4.94
class rooms 1.4.96
heat gain and 1.4.97
hospitals 1.1.10
industrial 1.5.277–288
industrial inspection and 1.5.289–294
offices 1.4.98, 1.5.122
road accidents and 1.4.92
road signs and 1.2.25
underground railway trains 1.1.4–11

India,
human factors and industrial development in 1.1.2

Industrial Design – see Design, industrial

Industrial Lights, 1.5.277–288
cleanliness 1.4.93

Industrial Illness (see also Musculoskeletal Disease), 1.5.262–269
in the wig industry 1.3.67

Industrial Inspection – see Inspection, industrial

Industry,
ergonomics and 1.1.26–32
in underdeveloped countries 1.1.1, 1.1.2

Information,
for passengers in underground railways 1.1.4–11

Injury,
agricultural work and 1.1.18

Inspection,
industrial 1.2.34, 1.3.49, 1.5.289–294
effects of noise in audiovisual task 1.3.57

Instruction Cards,
design of 1.2.24

International Ergonomics Association, 1.1.42–44
member societies 1.1.42–44

Interview,
techniques in personnel selection 1.4.202–206

Intoxication – see Alchohol

Japan Ergonomics Research Society, 1.1.42–44, 1.2.70–72

Jet Aircraft – see Aircraft, jet

Job Description, 1.2.66–69

Job Design,
employee participation in 1.2.33

Journals,
ergonomic design of 1.4.207–209

Landing,
optical rate displays in aircraft and 1.1.8

Lasers,
effects on human eye 1.2.28

Lathe – see Turret-Lathe

Layout,
instruction cards 1.2.24
road junctions 1.5.108
tabular information 1.4.234–242
workspace – see Workspace Design

Light-Fittings,
heat removal from 1.5.122

Lighting – see Illumination

Lights – see Road Lights, Industrial Lights, etc.

Lorries,
contribution to traffic noise 1.2.29

Loudness level (see also Noise),
assessment of by Niese Method 1.4.100

Luminance, 1.2.25
brightness of rooms and 1.5.124
measurement in road surfaces 1.5.126
pedestrial clothing 1.2.26

Machine Controls, 1.2.95–106

Machine Tools,
operation of 1.5.302–309

Management,
industrial inspection and 1.2.34

Medical Research Council,
work of Applied Psychology Unit 1.3.169–176

Meshes,
as window shading material 1.4.91

Method Study – see Work Study

Metric Rules,
design of 1.4.198–201

Metric System, 1.1.12–15

Microwaves,
effect on central nervous system 1.5.135

Military Vehicles,
fighting compartment design 1.4.87

Mock-Ups – see Simulators

Musculoskeletal Disease (see also Spinal Troubles),
working posture and 1.5.262–269

Music,
hearing damage and 1.3.61
Myoelectric hand prosthesis,
design of 1.3.72

Navigation,
aeronautical charts for 1.5.112, 1.5.113
helicopters 1.1.6
hovercraft 1.3.134–139
Navigation Bridges,
design of 1.4.88, 1.4.89
Netherlands Ergonomics Society, 1.1.42–44, 1.3.166–167
Niese Method,
for calculating loudness level 1.4.100
Noise (see also loudness level),
agricultural equipment 1.5.128
aircraft 1.1.11, 1.3.60, 1.4.103, 1.5.127
airport planning and 1.1.13, 1.3.60
automated meat handling 1.1.45–51
bibliography 1.1.11
buildings 1.5.129
construction equipment 1.5.128
control 1.1.12, 1.1.13, 1.2.73–78, 1.3.59, 1.4.217–222, 1.5.129, 1.5.132
discomfort and annoyance 1.3.54, 1.3.55, 1.3.58, 1.3.59, 1.4.99, 1.4.217–222, 1.5.129, 1.5.133
engine driver cabins 1.5.118
factories 1.5.131
hearing and deafness 1.3.58, 1.3.59, 1.5.128
hovercraft 1.3.134–139
index 1.3.54, 1.3.55, 1.3.58
industry (effects in) 1.2.73–78, 1.3.58 1.3.59, 1.4.217–222
inspection tasks and 1.3.57
measurement of 1.2.31, 1.2.32, 1.4.217–222, 1.5.133
occupational 1.3.58, 1.3.59
petroleum and chemical plant 1.3.56
prediction of from road traffic 1.1.14
productivity and 1.4.194–197, 1.4.217–222
road traffic 1.1.13, 1.1.14, 1.2.29, 1.2.30, 1.3.54, 1.3.55, 1.4.101, 1.4.102, 1.5.133
screw manufacturing plant 1.2.70–72
textile industry 1.5.132
tolerance standards 1.5.127
underground railways 1.1.4–11
Noisemeter, 1.2.31, 1.2.32

Offices,
efficiency and workstudy in 1.3.47
illumination of 1.4.98
open planning 1.5.117
working conditions 1.4.77
Oil tankers,
bridge design 1.4.88
workspace design 1.4.88
Open Planning,
in offices 1.5.117
Optical Rate Display,
design 1.1.8
Orthopaedics,
agricultural work and 1.1.18
Output – see Productivity

Passage-ways,
in underground railways 1.1.4–11
Passenger,
organisation in underground railways 1.1.4–11
Pedestrian,
reflectorised clothing 1.2.26
Personnel Selection – see Selection, personnel
Petroleum Industry,
design for noise control in plant 1.3.56
design of oil tanker bridges 1.4.88
Photogrammetry,
analysis of working posture and body movement 1.3.66
Physically Handicapped (see also Blind),
transportation needs 1.5.11
Physiology,
fatigue and 1.3.62, 1.3.65
housework and 1.4.223–227
turret-lathe operators 1.5.302–309
Pilots (see also Aircrew),
comparison between male and female 1.1.5
navigation in helicopters 1.1.6
training of 1.1.4
Pneumatic Pick Operators,
vibration disease in 1.3.75
Police,
design of patrol vehicles 1.5.114
Pollution,
atmospheric and spectral power distribution 1.1.9
Posture,
seat design and 1.3.159–165
turret-lathe operators 1.5.302–309
working 1.3.66, 1.3.151–158, 1.5.262–269
Process Plant,
design for noise control 1.3.56
Print – see Typeface
Productivity,
effects of environment on 1.4.194–197
effects of rest pauses on 1.2.35
turret-lathe operators 1.5.302–309
Programmed Learning,
clerical work and 1.2.45
texts and films for 1.2.40
Psychological,
fatigue 1.3.62
tests in personnel selection 1.3.140–143
Punishment,
road safety and 1.3.70

Radio Waves,
effect on central nervous system 1.5.135
Rail Traffic (see also Transport Systems and Railways),
congestion 1.1.4–11
control in underground 1.2.113–120
noise from underground 1.1.4–11
Railways (see also Rail Traffic),
drivers cabins 1.5.118
underground, passenger considerations 1.1.4–11
underground, operational aspects 1.2.113–120
Rating Scales – see Scales, rating
Raynaud's phenomenon, 1.3.74, 1.3.75
Reaction Time,
ageing and 1.2.39
athletes and non athletes 1.2.39
Reflectorised clothing – see Luminance
Rest Pauses,
effects on fatigue and productivity 1.2.35
turret-lathe operation 1.5.302–309
Road Accidents – see Accidents, road
Road Junctions,
and accidents 1.5.108
Road Lights,
accidents and 1.4.92
design 1.4.80
Road Markings,
at junctions 1.5.108
colour 1.4.83
cost and effectiveness 1.4.82, 1.4.83
Road Safety – see Safety, road
Road Signs,
design of 1.1.17, 1.4.80
effect of luminance on recognition 1.2.25
Road Surface,
measurement of luminance 1.5.126
Road Traffic,
noise from 1.2.29, 1.4.101
Road Vehicles (see also Cars, Buses, Lorries, Transport Systems),
headlight glare from 1.4.95
urban traffic control 1.2.21, 1.2.23
Roads and Highways, 1.4.80, 1.4.82
planning for noise reduction 1.1.13

Safety (see also Accidents),
clothing for road work 1.1.19
ergonomics design and 1.4.78
layout of motor vehicle driving compartments and 1.5.120
road 1.1.17, 1.4.80, 1.4.82, 1.4.92, 1.4.104, 1.5.108
road and punishment 1.3.70
Scales,
design 1.2.86–94
rating for buildings 1.3.144–150
Schools,
traffic noise in 1.2.30
Screw Manufacturing,
noise in plants 1.2.73–78
Seamstresses,
illness of in the wig industry 1.3.67
Seating,
design for industry 1.3.159–165
underground railway trains 1.1.4–11
Selection,
personnel 1.2.66–69, 1.3.140–143, 1.4.202–206, 1.5.273–276
personnel for automated processes 1.3.130–133
Sensory deprivation,
effect on auditory vigilance 1.3.63
Shift Work, 1.2.36
Ships,
bridge design 1.4.88, 1.4.89
Signs,
directional in underground railways 1.1.4–11
Simulation techniques,
by computer 1.2.73–78
Simulators,
combine harvester operation 1.5.107
pilot training 1.1.4, 1.2.42
underwater rescue vehicles 1.5.115
Skin Temperature,
and cold microclimate 1.3.76
Sleep Deprivation,
effects on productivity 1.4.194–197
partial deprivation and vigilance 1.2.38
Slide Rules,
design of 1.4.198–201
Sonic Boom, 1.1.13
Spectral Power Distribution,
of daylight 1.1.9
Spinal Troubles (see also Musculoskeletal Disease),
in aircrew 1.5.109
Staff,
of underground railways 1.1.4–11
Stop Lights – see Brakelight Displays
Street Lights – see Road Lights
Surgical Equipment,
design of needleholder 1.3.68
Système International d'Unités (SI), 1.1.12–15

Tabular Information,
presentation of 1.4.234–242
Task Analysis,
for workspace design 1.3.151–158
Temperature,
environmental effects in automated meat handling project 1.1.45–51
environmental effects in industry 1.4.210–216
environmental effects on productivity 1.4.194–197
extremes in the environment 1.4.210–216
of skin and cold microclimate 1.3.76
Textile Industry,
noise in 1.5.132
Thermal Design,
acoustic design and 1.5.129
Thermal Environment – see Temperature, environmental effects
Time-sharing,
in pilot training 1.1.4
Tools,
design of handles for 1.3.68
Traffic – see Road Traffic, Rail Traffic, etc.
Train Driving – see Railways, operational aspects
Trains,
vibration in 1.5.258–261

Training (see also Programmed Learning),
bibliography 1.5.105, 1.4.106
personnel for automated processes 1.3.130–133
pilots 1.1.4, 1.2.42
psychological testing for personnel selection 1.3.140–143
schemes 1.2.43, 1.2.44
Transport Systems,
planning for 1.2.22, 1.2.23
Trawlermen,
protective clothing for 1.3.73
Tube trains – see Railways, underground
Turret-Lathe,
operation of 1.5.302–309
Typeface,
word identification and 1.3.53

Underdeveloped Countries (see also specific countries eg India),
industrial development in 1.1.1, 1.1.2
Underground Railways – see Railways, underground
Underwater Rescue Vehicles,
design of 1.5.115

Ventilation,
automated meat handling 1.1.45–51
underground railway trains 1.1.4–11
Vibration,
disease 1.3.74, 1.3.75
factories 1.5.131
helicopters 1.5.134
hovercraft 1.3.134–139
single and multi axis 1.5.258–261
Victoria Line – see Railways, underground
Vigilance,
auditory and sensory deprivation 1.3.63
effects of noise on 1.3.57
industrial inspection tasks 1.3.49, 1.3.57
Vision,
industrial inspection and 1.5.289–294
from hovercraft 1.3.134–139
from underground railway trains 1.1.4–11
workspace design and 1.3.151–158

Weaving Looms,
noise from 1.5.132
Windows,
aesthetics of buildings and 1.3.144–150
design 1.5.270–272, 1.5.121
meshes used as window shades 1.4.91
industrial lighting and 1.5.277–288
Window Handles,
heights of 1.5.270–272
Windscreens,
injury by in car accidents 1.3.69
Words,
identification and typesize 1.3.53
Working Environment (see also Environment), 1.4.77, 1.1.33–41, 1.5.118
Working Posture – see Posture, Working
Work Load,
fatigue and 1.3.62, 1.3.65
of turret-lathe operators 1.5.302–309
Work Measurement – see Work Study
Work Physiology, 1.1.15
Workspace Design (see also Design), 1.1.33–41, 1.3.66, 1.3.151–158
automated meat handling 1.1.45–51
engine drivers cabins 1.5.118
motor vehicle driving compartments 1.5.120
musculoskeletal disease and 1.5.262–269
noise control 1.2.73–78
road signs 1.4.80
ships 1.4.88, 1.4.89
street lighting columns 1.4.80
Workspace Layout – see Workspace Design
Workstation Analysis, 1.1.33–41, 1.1.45–51
Work Study, 1.1.16
electromyography and 1.3.46
in offices 1.3.47

Author index

Anderson, D. M.
Ergonomics in action – 2. The Ergonomics Laboratory, EMI Electronics Ltd. 1.4.228–233

Batts, V.
Ergonomics in action – 1. Medical Research Council Applied Psychology Unit 1.3.169–176

Beevis, D.
Ergonomics – costs and benefits 1.2.79–84

Beevis, D.
Ergonomics in action – 2. The Ergonomics Laboratory, EMI Electronics Ltd. 1.4.228–233

Bond, J.
Ergonomics in journal design 1.4.207–209

Brown, I. D.
Ergonomics in action – 1. Medical Research Council, Applied Psychology Unit 1.3.169–176

Canter, D.
The effect of the meaning of buildings on behaviour 1.3.144–150

Chanda, B.
Shielding factory noise by work-in-progress storage 1.2.73–78

Corlett, E. N.
Shielding factory noise by work-in-progress storage 1.2.73–78

Corlett, E. N.
The ergonomics of vertical turret-lathe operation 1.5.302–309

Dodd, J. H. B.
Personnel selection – the procedure 1.2.66–69

Dodd, J. H. B.
Personnel selection – 2. Testing 1.3.140–143

Dodd, J. H. B.
Personnel selection – 3. Interviewing 1.4.202–206

Dodd, J. H. B.
Personnel selection – 4. Conclusion 1.5.273–276

Fox, K.
Presenting information in tables 1.4.234–242

Helps, F. G.
Minimising human problems when introducing automation 1.3.130–133

Kirk, N. S.
Ergonomics testing of consumer products – 1. General considerations 1.5.295–300

Klinkhamer, H. A. W.
Ergonomics around the world – The Netherlands 1.3.166–167

Lovesey, E. J.
The hovercraft environment 1.3.134–139

Lovesey, E. J.
The multi-axis vibration environment and man 1.5.258–261

McGougan, C. E.
Ergonomics in action – 1. Medical Research Council, Applied Psychology Unit 1.3.169–176

Miles, R. J.
Scale design of metric rules and scale rules 1.4.198–201

Morcombe, V. J.
Shielding factory noise by work-in-progress storage 1.2.73–78

Oates, J. M.
Opening windows 1.5.270–272

Oshima, M.
Ergonomics around the world – Japan 1.2.70–72

Poulton, E. C.
Ergonomics in journal design 1.4.207–209

Pratt, F. M.
The ergonomics of vertical turret-lathe operation 1.5.302–309

Raffle, A.
The Victoria line – passenger considerations 1.1.4–11

Raffle, A.
The Victoria line – operational aspects 1.2.113–120

Ridgway, S.
Ergonomics testing of consumer products – 1. General considerations 1.5.295–300

Rolfe, J. M.
Human factors and the display of height information 1.1.16–24

Sell, R. G.
The Victoria line – passenger considerations 1.1.4–11

Sell, R. G.
Ergonomics around the world 1.1.42–44

Sell, R. G.
The Victoria line – operational aspects 1.2.113–120

Shackel, B.
Workstation analysis – turning cartons by hand 1.1.45–51

Slade, I. M.
Ergonomics – costs and benefits 1.2.79–84

Stockbridge, H. C. W.
Scale design of metric rules and scale rules 1.4.198–201

van Wely, P.
Design and disease 1.5.262–269

Ward, J. S.
Ergonomics in the home 1.4.223–227

Warren, T. R.
Adopting SI 1.1.12–15

Warren, T. R.
Ergonomics in journal design 1.4.207–209

Wilkinson, R.
Productivity and the environment 1.4.194–197

Wools, R.
The effect of the meaning of buildings on behaviour 1.3.144–150

Wright, P.
Economics and ergonomics in coin design 1.1.53–57

Wright, P.
Presenting information in tables 1.4.234–242
